

Step 3: Strengthen Customer Relationships with the Use of Data to Build Loyalty for the Long-term

1. Get Data – Launch of Heritage Spirits Club and Initiate Social Media Platforms Integration

Collect information from members: name, email, address, birthday, how did they hear about us, etc.

Send automated emails to gather customer feedback (e.g. post-tour, surveys to gauge customer interest)

Integrate with social media platforms to manage online growth and engagement

2. Use Data – Develop Customer-Centred Strategies

Analyze collected data to understand customer behaviour and sales analytics (e.g. assist in crafting marketing strategies for social media)

- Brainstorm different customer strategies for engagement
- Promotions depending on factors such as visit frequency and distance from distillery

Benefits and Limitations

Personalized offers and promotions can be presented to members based on their purchase habits or preferences

Centralized location to manage and organize customer analytics

Staff responsible for managing the CRM may require additional training or a new hire is required to ensure smooth operation

Resources Needed

- Subscription to the CRM service
- CRM specialist OR training for the social media team to manage the CRM system and overview of automated emails
